The bidder's failure to complete and return this document with the bid as directed above will cause the State to presume the manufactured goods or products listed in the bid are not manufactured or produced in the United States, and the bid will be evaluated on that basis pursuant to Section 34.353.3(2), RsMO.

**Bridge Deck Sealing/Resurfacing
Bridge A4162 on Rte CC
Bridge A4431 on Rte AC
Franklin County, MO**

SCOPE OF WORK:

The scope of this project includes cold milling approaches and resurfacing the approaches and bridge decks of two structures with one lift of UBAWS (Ultrathin Bonded Asphalt Wearing Surface), at an anticipated depth of $\frac{3}{4}$ " , for the purpose of sealing the specified bridge decks and providing asphalt approach transitions. Both bridges have worn chip seals in place that are approximately 12 years of age. These chip seals will remain in place and be paved over. The intention is to use an adjusted polymer modified emulsion membrane shot rate, at roughly double the normal rate, to achieve a quality seal for bridge deck preservation.

The two structures involved are roughly 1.6 miles apart in the southwestern quadrant of Franklin County, south of Gerald, MO. Bridge A4162 is Rte CC over the Bourbeuse River and Bridge A4431 is Rte AC over Boone Creek. A4162 has dimensions of approximately 411 ft x 27 ft (curb to curb) and A4431 is roughly 128 ft x 27 ft (curb to curb). Grade adjustment transitions of approximately 75 ft in length on both ends of both structures shall be provided.

MODOT will be responsible for performing any deck and approach maintenance that must be accomplished prior to the overlays. This shall include patching, deck repair, crack sealing, vegetation removal, loose chip seal removal, etc. The contractor shall be responsible for cleaning of the surfaces prior to overlays in accordance with MODOT Standard Specifications.

All pertinent standards and specifications, including those mentioned in this document, are accessible on the Missouri Department of Transportation website (www.modot.mo.gov) under "Business With MODOT" and "Standards and Specifications". The effective version will be determined by the letting date of the project.

These supplemental bidding documents contain all current revisions to the bound printed versions and have important legal consequences. It shall be conclusively presumed that they are in the bidders possession, and they have been reviewed and used by the bidder in the preparation of any bid submitted for this project.

TRAFFIC CONTROL:

All traffic control is the responsibility of the contractor and shall conform to the more stringent of Missouri Standard Specifications for Highway Construction or MUTCD standards. Particular attention shall be paid to section 616 of the Missouri Standard Specifications. It is important that all work progress in a systematic manner so as to minimize the traffic impedance. The contractor must maintain one lane of flowing traffic at each site through the duration of the work. With both routes consisting of only two lanes of traffic, flagmen and appropriate signing must be provided in accordance with standards mentioned above. A Traffic Control plan shall be submitted to the Engineer for approval at least 3 working days prior to initiation of work. Traffic Control shall be paid per Lump Sum.

MILLING:

Cold milling shall be performed on the approaches of both structures as mentioned above, in order to provide depth transitions to the bridges. Butt joints at $\frac{3}{4}$ " depth shall be milled at approximately 75 ft from both ends of both structures and tapered over 50 ft to accomplish a smooth grade transition into the bridge approaches.

The contractor will be responsible for supplying the trucks and drivers, mill, and any other equipment necessary to catch or gather the millings as they are removed. Any water needed for work items shall also be the contractor’s responsibility to provide. All disposal of the millings shall also be the responsibility of the contractor. No disposal of millings on site will be permitted.

Payment for milling will be by the square yard for “Modified Cold Milling (Depth Transitions)”. Field adjustments made to milling dimensions as specified above shall be at the discretion of the Engineer. The accepted quantity of milling shall be paid at the contract bid price for Modified Cold Milling.

All milling shall be performed according to Missouri Standard Specification Section 622.

Slab drains in the decks at both locations shall be covered prior to the milling process to protect the drainage slope and wetlands below the structures. No direct payment will be made for this requirement.

CONSTRUCTION REQUIREMENTS (UBAWS)

The contractor shall be responsible for providing all materials, equipment and labor necessary to successfully place a Type C UBAWS as specified or unless as noted. All materials, elements and procedures involved with placing the UBAWS shall conform to Missouri Standard Specification 413.30 “Ultrathin Bonded Asphalt Wearing Surface”, unless as otherwise specified in these documents. Payment shall be made by the SY for Ultra Thin Bonded Asphalt Wearing Surface.

It is possible that wedging or leveling prior to the final UBAWS course will be necessary in isolated areas, generally in the bridge approach slab areas, to remove surface imperfections or dips and provide a satisfactory profile. UBAWS may be utilized as wedging material for these isolated areas and shall be bid under the item “Wedging” per ton. This item will include all materials necessary to properly wedge an area prior to UBAWS final course.

Slab drains in the decks at both locations shall be covered prior to the overlay process to protect the drainage slope and wetlands below the structures. No direct payment will be made for this requirement.

MATERIALS:

AC Content Minimum of 5.0%

The contractor shall bid 2 optional mix designs which incorporate aggregate as herein specified. The bids for the alternates will be evaluated and low price may not be the sole factor in selecting the particular mix design to be utilized.

Mix Design #1 shall be in accordance with Specification 413.30

Mix Design #2 shall be in accordance with Specification 413.30 except:

Coarse Aggregate (+ No. 4)	Minimum Non-Carbonate by Volume
Limestone	95% Plus No. 4
Dolomite	No Requirement

The Non-Carbonate aggregate shall be Porphyry, Granite, or Steel Slag.

GENERAL TERMS AND CONDITIONS

General Performance

- a. This work is to be performed under the general supervision and direction of the Missouri Department of Transportation (MoDOT) and, if awarded any portion of the work, the Contractor agrees to furnish at his own expense all labor and equipment required to complete the work, it being expressly understood that this solicitation is for completed work based upon the price(s) specified and is not a solicitation for rental of equipment or employment of labor by MoDOT, and MoDOT is to have no direction or control over the employees used by the Contractor in performance of the work.

Nondiscrimination

- a. The Contractor shall comply with the Regulations relative to nondiscrimination in federally-assisted programs of the Department of Transportation, Title 49, Code of Federal Regulations, Part 21, as they may be amended from time to time, (hereinafter referred to as the Regulations), which are herein incorporated by reference and made a part of this contract.

- b. The Contractor agrees and understands that the contract shall constitute an assignment by the Contractor to the MHTC of all rights, title and interest in and to all causes of action that the Contractor may have under the antitrust laws of the United States or State of Missouri for which causes of action have accrued or will accrue as the result of or in relation to the particular equipment, supplies, and/or services purchased or produced by the Contractor in the fulfillment of the contract with the MHTC.

Award may then be made to the next lowest responsible bidder, or the work may be re-advertised and performed under contract or otherwise, as the Commission may decide. No contract shall be considered effective until it has been executed by all parties thereto.

- b. The quantity finally ordered by the Commission will be furnished by the bidder at the same unit price per ton.

Temporary Suspension of Work

- a. The **District Engineer** shall have authority to suspend work wholly or in part for such period or periods as may be deemed necessary when weather or other conditions are such that in the opinion of the engineer, the work may be done at a later time with advantage to the Department or for failure on the part of the Contractor to comply with any of the provisions of the Contract.
- b. If the Department suspends the work for its own advantages and not because of the Contractor's failure to comply with the Contract, the Contractor will be allowed an equal number of calendar days after the completion date for the completion of the work. Liquidated Damages

- a. In the event the successful Contractor fails to deliver the material within the time specified, the Department and the public will sustain damages because of such delay in delivery, the exact extent of which would be difficult to ascertain, and in order to liquidate such damage in advance it is agreed that the **sum of five-hundred dollars (\$500.00) per day**, for each assessable calendar day on which the delivery has not been completed, is reasonable and the best estimate which the parties can arrive at as liquidated damages, and it is therefore agreed that said amount will be withheld from payments due the Contractor or otherwise collected from the Contractor as liquidated damages.
- b. **Saturdays, Sundays, holidays and days whereas the Department has suspended work** shall not be assessable days.

The Contractor and its subcontractor(s) shall require all such employees to complete this ten-hour program, pursuant to 292.675 RSMo, unless they hold documentation on their prior completion of said program. Penalties for non-compliance include Contractor forfeiture to the Commission in the amount of \$2,500, plus \$100 per contractor and subcontractor employee for each calendar day such employee is employed beyond the elapsed time period for required program completion under 292.675 RSMo.
